Jl Datuk M.Akib No.04/09, Palembang, Sumatera Selatan

Fresh Graduate in Information Systems from Universitas Sriwijaya with a GPA of 3.95. Possesses strong analytical thinking, communication, teamwork, and problem-solving skills through internship experience, organizational activities, and leadership roles. Experienced in data processing, reporting, dashboard development, and operational support using Microsoft Excel, SQL, Power BI, and Python. Fast learner, adaptable, and highly motivated to grow professionally in data, business, and operational fields.

Education Level

Universitas Sriwijaya - Indralaya, Indonesia Aug 2022 - Feb 2026

Bachelor of Information Systems, 3.95/4.00

- Published 2 scientific articles in SINTA 4-indexed journals, focusing on data analysis and information systems

Work Experiences

PT PLN (Persero) - Lahat Dec 2024 - Jan 2025

Data Analyst Internship

- Analyzed customer receivables data using Microsoft Excel to monitor outstanding payments and identify overdue accounts, improving visibility of payment status
- Processed, cleaned, and validated customer data to ensure high data accuracy and consistency in reporting, reducing potential data errors
- Developed a data tracking application using AppSheet to digitize customer contact and material monitoring processes, increasing efficiency of data management
- Generated periodic financial reports (petty cash & receivables) to support operational decision-making, enabling more data-driven actions

Organisational Experience

PKKMB Universitas Sriwijaya (BEM UNSRI) Jun 2024 - Aug 2024

Head IT & Operator – PKKMB UNSRI 2024

- Managed and validated data of 8,900+ new students, ensuring high data accuracy and reducing potential data inconsistencies during event preparation
- Organized and structured student data into 150+ operational groups, improving coordination efficiency and streamlining event execution
- Coordinated IT systems and data flow during large-scale university events, ensuring smooth operations and minimizing technical disruptions

International English Festival 2024 Oct 2024 - Dec 2024

Staff of Technology & Information Development

- Developed interactive web interfaces with a focus on structured data presentation, improving clarity and accessibility of information for users
- Improved user experience by optimizing layout and data flow, enhancing usability and navigation efficiency
- Collaborated with cross-functional teams to ensure efficient data display and user interaction, supporting better user engagement

SI FEST 2023 Sep 2023 - Dec 2023

Staff of Technology & Information Development

- Developed and maintained frontend interfaces with a focus on data display and usability, improving data accessibility and user experience
- Collaborated with cross-functional teams to enhance user experience based on data and user feedback, supporting continuous system improvement
- Contributed to system improvements by providing data-driven insights, increasing data accessibility and overall usability

Projects

Customer Shopping Behavior Analysis using Python, PostgreSQL, SQL & Power BI June 2026

- Processed and analyzed 3,900+ customer transaction records using Python, PostgreSQL, and SQL to prepare clean, reliable data for business analysis.
- Identified customer segments, purchasing behavior, product performance, subscription trends, and revenue distribution through SQL queries and exploratory data analysis.
- Built an interactive Power BI dashboard featuring KPIs, customer insights, revenue analysis, and business recommendations to support data-driven decision making.

Sales Performance Analysis of iPhone SE 2022 in Indonesia (Power BI)

March 2026

- Analyzed 15,000+ transaction records with total revenue of Rp9 billion and profit of Rp1.13 billion to evaluate business performance.
- Identified sales growth trends (10–15% increase YoY) and key contributing regions such as West Jakarta, Semarang, and Makassar.
- Developed an interactive Power BI dashboard to monitor KPIs and support strategic decision making.

Customer Credit Card Analysis & Dashboard (Looker Studio)

March 2026

- Analyzed 5,000+ customers and 655,000+ transactions with total value of \$44.5 million.
- Identified high-value segments (businessman & white-collar) contributing over 60% of revenue.
- Built an interactive dashboard for customer segmentation, transaction patterns, and risk profiling.

Querix – SQL Analytics Learning Platform

Apr 2026 – May 2026

Live Demo : <https://querix.vercel.app/>

- Developed a practical SQL learning platform focused on business data analysis, database querying, and analytical problem-solving.
- Designed real-world SQL case studies covering customer analysis, sales performance, aggregation, segmentation, and reporting scenarios.
- Built interactive exercises to strengthen data extraction, transformation, and analytical thinking skills commonly required in Data Analyst roles.

BelajarDataKu – End-to-End Data Analyst Learning Platform

May 2026 – Jun 2026

Live Demo : <https://belajar-dataku.vercel.app/>

- Developed a comprehensive platform that guides aspiring analysts through data analysis workflows, including Excel, SQL, Data Cleaning, EDA, Statistics, and Power BI.
- Structured practical business case studies, portfolio projects, and interview preparation materials based on industry Data Analyst requirements.
- Designed learning paths that simulate real-world analytical processes, from raw data preparation to business insight generation and dashboard reporting.

Skills

- **Hard Skills:** Microsoft Excel, SQL, Python, Power BI, Google Looker, Data Cleaning, Data Analysis, Data Visualization
- **Soft Skills:** Analytical Thinking, Problem Solving, Attention to Detail, Communication, Teamwork

Achievements

- Achieved Top 1 Rank on Ngulik Data SQL Leaderboard among 5,000+ participants through consistent completion of SQL and data analysis challenges
- Published 2 Scientific Articles in SINTA 4 Indexed Journals (2025)
- Awarded as Most Active Staff Member in Research & Technology Division (PTI)

Certifications

- Certified Data Analyst (CDA) – BNSP (2026)
- Data Analyst Training (CDA) – Syntaxnesia (2026)
- Data Analyst Python & SQL – Udemy (2026)
- Data Engineering: Beginner to Advanced – Kelas.work (2026)
- Data Visualization in Looker Studio – MySkill (2026)
- Understanding Business Process – MySkill (2026)
